DETAILED ACTION

Status of the Claims

Claims 1-26, 28-47; 49-67 69-73, 75 and 77 have been canceled. Claims 27, 48, 68, 74, 76 and 78 are under Examination. The Examiner has re-numbered the said claims as claims 1-6.

Specification Corrections

Examiner acknowledges Applicant's amendment to the specification overcoming former objections.

Allowance

The following is an examiner's statement of reasons for allowance: In re-numbered claims 1-8, Applicants claim a series of methods for lowering:

- Blood glucose,
- Serum triglycerides and
- Blood pressure

In a subject, by administering to the said subject an effective amount of compound II as identified in the said claims.

No prior art disclosing or suggesting the claimed compounds was found in the prior art.

The closest art relevant to Applicant's instant invention was found in Takahashi et al, JP 63290842 (1988).

Takahashi discloses a method for preparing 2-(substituted phenyl) propionic acid or alkyl ester thereof, useful as pharmaceutical or intermediates thereof, useful as antipyretic, analgesic, and anti-inflammatory, see page 3 in translation, lines 5-18.

Art Unit: 1625

The said alkyl esters are of lower alcohols and the substituted phenoxy derivative such as the corresponding 4-phenoxyphenyl. Takashi, however, does not teach or suggest methods for lowering the blood pressure, glucose or lower serum triglycerides.

CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
